EMPOWER IVD • GLOBE

Empower Project

**Master comparisons
with 20 native, single
donation sera!**

**Peer group Patient
Percentile Monitoring!**

**Global
platform for
manufacturer/
laboratory
dialogue!**

**FREE for laboratories
until September 2015**

Laboratory Benefits

Master comparisons#

- Assess intrinsic assay quality and comparability
- Set peer benchmark performance standards for the IVD community
- Develop high profile towards physicians and regulators

#Limited number of places (20 per peer group).

Percentile monitoring

- Continuous monitoring of stability & bias
- Peer group comparison
- Manufacturer comparison
- Long-term quality management tool
- Suitable quality indicator (ISO 15189)
- Predict your PT (EQA) performance

Manufacturer benefits

Master comparisons

- Assessment of field performance by use of commutable samples
- Cross-check of application laboratory bias
- Comparison with other manufacturers
- Support to global healthcare politics

Percentile monitoring

- In-field monitoring of instrument stability & bias
- Global IVD market overview
- Excellent database for instrument troubleshooting
- Excellent tool for laboratory dialogue
- Excellent tool for dialogue with regulators

Empower IVD ● GLOBE

The ideal global platform for laboratory/manufacturer dialogue and assay improvement.

Enhancing the introduction of electronic health records by creating evidence of in-field comparability of patient results.

Ultimately, benefits the PATIENT!
