

External Quality Assessment Program for

***Bordetella pertussis/parapertussis*, nucleic acid detection**

Labquality EQAS by Aurevia is announcing a new EQA scheme for *Bordetella pertussis/parapertussis*, nucleic acid detection for 2025. The scheme is suitable for different nucleic acid detection tests. The scheme includes two non-infectious liquid samples that should be analysed as regular patient samples. The participants submit their results through the electronic platform LabScala and results are processed by the EQA Coordinator. Result evaluations including comments by the Scheme Expert will be published in the final report distributed to the participants. There will be two rounds in 2025.

5241 *Bordetella pertussis/parapertussis*, nucleic acid detection

- Samples: 2 simulated samples (1 mL each)
- Distribution: May and October 2025
- Registration: Please register in LabScala or through your local distributor
